

How to do it :

First you have to obtain the agent using the Ice-O-Later or similar device.

If you need any help, feel free to mail us at info@piecemaker.at .

Then, over a pan or similar...

...you fill in the material using a spoon and a funnel.

don't forget to put in your personal inlay ...

...then you can start pressing. If the piecemaker can't be turned anymore, pause and turn again, pause and turn again...

Usually it is not necessary to use a vice or similar device...

You can also warm up the piecemaker using your stove or a hairblower. Don't overdo it !

Unscrew the lid...

...take out the piece...

Done, and ready for use !
